

Music Websites

Music Sites for Creating Music

- The Minuet Mixer comes from the wonderful New York Philharmonic Game Room. Students can create and play their own minuets. The url for their compositions can be emailed and posted on a blog or online journal.

Music Sites for Creating Music

- Once you go to Soundbadge, you have to answer several questions about yourself. Based on the answers, a unique musical sound is created. You can then email the url of your “soundbadge” and post it on a blog, website or online journal.

Music Sites for Creating Music

- Contrapunctus Variations (what a name!) lets you create musical compositions with your computer mouse. It's difficult to explain in a post, but once you go there it will become clear. You can save your composition, describe it, and email the link for posting in a blog or teacher's website. No registration is required.

Music Sites for Creating Music

- With the Carol-Maker you can compose a never-heard-before mashup of strange grunts with classic Christmas songs, and email it to a friend (or enemy).

Music Sites for Creating Music

- Here's another site where you can make your own music – this time from The Make Your Own Music Game. Email your creation for posting on a website or blog.

Music Sites for Creating Music

- You can compose your own song of musical animals sounds at [Nim's Island Animal Jukebox](#), and then email it to a friend or teacher for posting on a website or blog.

Music Sites for Creating Music

- The Japanese Federation of Construction Contractors have created Build Up!. It lets you “build” a skyscraper of music made by construction tools. It’s pretty neat. Much of the site is in English, the part about emailing your creation is in Japanese, but just click on some things and you’ll figure it out.

Music Sites for Creating Music

- Jam Studio and seems pretty easy to use. Music learners can very quickly compose a song, email and post the url.

Music Sites for Creating Music

- I like two music games designed by a creative designer named Luke Whittaker. His latest creation is an amazing online video game called Sound Factory. It's very hard for me to explain. Basically, you role-play a man in a factory who get to create music. That description, however, does not in any way do the game justice. There are a lot of instructions given in simple English, and students can email their final musical creation after they've finished the game. I also have listed the "Walkthrough" (answers) to the game on my website so students can doubly use it as a language development exercise. In A Break In The Road students can again create their own musical composition. It's not quite a game, but I won't even attempt to describe it

Music Sites for Creating Music

- The I Know That Music Maker is easy to use, though it does require a simple registration.

Music Sites for Creating Music

- The BBC has two nice tools to make music online — 6 Mixer and VJ Masher.

Music Sites for Creating Music

- KissTunes is a great web tool that lets you make some music and lets you give it a name and describe it. Then, you get a url address for your creation where others can then leave comments. You don't even need to register!

Music Sites for Creating Music

- The only way I can explain Glitchscape is it lets you make boxes and then turns them into music. You then get the url address of your creation for posting on a blog or website. No registration is required

Resources for Music Education

- [iBlocs](#)- create and share music
- [Jamstudio](#)-create you own original music
- [Songsterr](#) -sing and play the guitar online
- [Primary Music](#) -fun interactive games
- [Ksolo](#)- Karaoke for the internet
- [K-12 Resources for Educators](#)
- [Muveemix](#)- create movies with audio
- [Pianopedia](#)- piano resources
- [Nayio](#)- create your own music videos

Resources for Music Education

- Jamglue- create and remix your music online
- Karaokeparty- sing online and earn high points. Great for music classes!
- Dance for Science - Imagine having students try this!!! <http://gonzolabs.org/dance/>
- Build a Jam- create your own music, collaborate and share online

Resources for Music Education

- Virtual Drum Kit
 - Ken Brashear has made a giant drum kit that you play simply by hitting the different hotspots on the image. Very therapeutic.
- Music Match Game
 - This game helps you learn how to play the piano and read music. You can learn the notes, learn the keys or both.
- Drum Machine
 - An interactive drum machine that lets you build up different beats to create your own drum track which you can then export as a swf file.
- Poisson Rouge Piano
 - A simple interactive piano that lets you produce a tune and then play it back. Will show the musical notation at the same time.

Resources for Music Education

- Muxicall
 - A collaborative “wall of music” Click on the notes to play a track, but other people can also be using it at the same time and play music between you!
- Toy Theatre Music
 - 4 different games here. Compose your own music, create drum beats, music maker and piano puppet. Try them out!
- Musical Monsters
 - A paid-for resource that is wonderful for students. Create rhythms and melodies by putting the singing creatures onto the music board, then listen to – and watch – the results.
- Reindeer Orchestra
 - Probably best left until close to Christmas, but click on the reindeer’s noses to make them sing. Choose from several christmas carols, or free play mode.

Resources for Music Education

- Noteflight- An online editor that helps you compose complicated songs on sheet music! Read more about Noteflight and other online music editors here.
- LilyPond- Free musical notation software that has so many features, including being compatible with MAC, pc, and Linux. Read about this amazing software here!
- Absolute Sound Effects Archive- You may like to host your own podcast and need background music or sound effects. Here is a resource with many sounds for free!
- Classik TV- Create music videos or films with subtitles! Russell Standard recommended this as a top tool for students to make videos.
- Audacity- For my Mac I use Garage Band for podcasting and creating music, but for my PC you can download Audacity for free! See Russell Stannard's tutorial on using Audacity.

Resources for Music Education

- Musipedia- This website allows your students to edit any information on various tunes, melodies, and musical themes. You can also whistle a tune or play the tune on a piano and Musipedia will identify the tune for you.
- Copyright Friendly Wiki- Find creative common images and sounds for multimedia projects.
- 30 + Places to Find Creative Commons Media- This has incredible sources for finding music.
- Inudge- Cool tool to create music by selecting various sound patterns with your mouse.
- Museeca- A search engine for music lovers. Search guitar tabs, mp3s, lyrics, ringtones, and music videos.
